ABOUT VOCATIONAL PROGRAMS

Vocational Programs are introduced to promote the idea of learning while working as an alternative to the conventional study-and-try-for-a-job approach respectively.

It supports the central government's objective of enhancing the standard of human resources as a key component of the new education policy introduced by the government. Mission of Vocation Program is to create skilled people helping them better Job or Entrepreneurship opportunities and help entrepreneurs with Interns for 3 to 5 years

A vocational qualification can be a terrific way to stand out to employers and provides students the practical skills they need to begin climbing the professional ladder as soon as they graduate.

Here, the students are not supposed to pursue professional experience at the whim of fate but are supported by proper knowledge and rare skill sets along with placement assistance.

The students begin receiving internships/job training in the industry vertical in which they choose to graduate right after orientation.

Academic Excellence

A WORLD-CLASS EDUCATION

INTRODUCTION TO VOCATIONAL COURSES

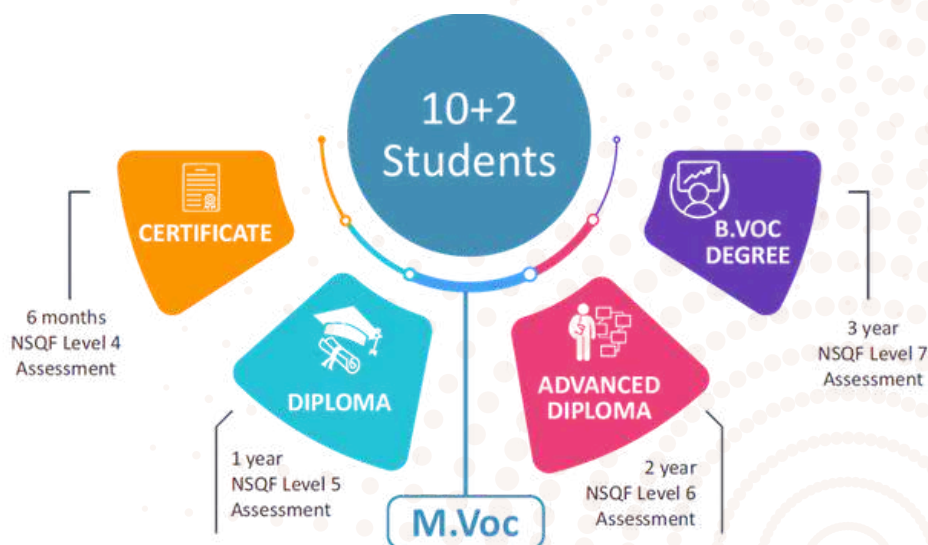

“Skill-based education should be the foundation of modern education”, with a similar view, the University Grants Commission (UGC), in 2013, introduced the Bachelor of Vocational, commonly known as B.Voc degree program with multiple entry and exit points. B.Voc is a three-year program that specifically focuses on skill development and makes the students industry-ready. Today, there are more than 100 disciplines/trades for which the B.Voc degree courses are available. Some of the most popular courses include B.Voc in Retail Marketing, Food Processing, Healthcare, Technology, and Renewable Energy.

The General Education Components (GEC) and Skill Education Components (SEC) would be appropriately balanced in each semester/year of the program’s curriculum at a predetermined ratio of 40:60.

Overall Credits – A degree can be completed in three years with 180 credits, or 30 credits every semester.

DURATION OF THE COURSE

The duration of this bachelor course will be 3 years, i.e., 6 semesters with the flexibility of exit after completion of 2nd & 4th semesters. On the other hand, the duration of the master’s will be of 2 years in 4 semesters.
